👤 PROFILE

A driven web developer who welcomes challenging projects and enjoys working with all sorts of personalities. Experienced in scripting as well as design patterns. Looking for a full-stack developer position.

💼 EMPLOYMENT HISTORY

Java Web Developer at Sberbank, Moscow

February 2016 — Present

Started as a Java automation developer in the test, I made a huge impact on product and suddenly became Web Developer because I was fast in developing with a very high quality of my work.

- Continually excelled both individually, and also as a team player.
- Navigated large workloads with a sense of calm and superior organizational skills.
- Aimed to support a positive and productive work culture.

Test Engineer at Arqa technologies, Novosibirsk

June 2015 — February 2016

Conducting manual and the automatic testing of banking software, drawing up test cases, checklists. Participation in automation. Helping Support team in solving user problems, reproducing problems and errors, a detailed description of failures.
Gained experience in testing desktop applications, got experience in banking software development

Test engineer/Business Analyst at NGS.RU, Novosibirsk

July 2012 — March 2015

Manual and automatic testing of products. Writing test scripts.
High rates of product quality. Mastered Selenium ide, git, MySQL, mongo, got acquainted with JSON, learned to write SQL queries, mastered the bug tracking system Jira, as well as Confluence. The team project has been completely rewritten and tested by myself and there was no bug report month after deploy. This was positively noted by company management.

🎓 EDUCATION

Master's degree, Novosibirsk State Technical University, Novosibirsk

September 2006 — July 2012

Automated information processing and control systems

Software Developer Using Java Enterprise Edition Technologies, CENTER FOR SPECIALIZED IT-TRAINING OF INNOPOLIS UNIVERSITY, Innopolis

August 2018 — December 2018
