👤 PROFILE

An enthusiastic web developer with industry experience in developing and optimizing algorithms with a focus on efficiency, quality, and automation.

💼 EMPLOYMENT HISTORY

Java Web Developer at Sberbank, Moscow
February 2016 — Present

- Developed integration's with other banking systems via JMS(Active MQ), Kafka.
- Developed the CI/CD pipeline from scratch for the automatic build and deployment of the project on the benches.
- Was the head of the testing automation group (4 people), which during the year implemented more than 1,500 user interface tests from scratch (which amounted to 50% of the coverage of business functionality)

Test Engineer at Arqa technologies, Novosibirsk
June 2015 — February 2016

- Manual and automatic testing of banking software, a compilation of test cases, checklists. Helped the support team in solving user problems, reproducing problems and errors, a detailed description of failures.
- Developed autotests and supporting applications to accelerate banking software testing

Test engineer/Business Analyst at NGS.RU (https://ngs.ru/), Novosibirsk
July 2012 — March 2015

- As the only QA engineer in the team, I checked out a completely new version of the project after refactoring without missing a single serious bug. This has been noted by users and my management.
- Implemented UI auto-testing of the project

🎓 EDUCATION

Engineer's degree, Novosibirsk State Technical University, Novosibirsk
September 2006 — July 2012

Automated information processing and control systems

Software Developer Using Java Enterprise Edition Technologies, CENTER FOR SPECIALIZED IT-TRAINING OF INNOPOLIS UNIVERSITY, Innopolis
August 2018 — December 2018
